Esheria Legal Workflow OS: Executive Proposal

2026-03-07

1 Strategic Shift

Esheria moves from product-fragmented capabilities to a unified multi-tenant legal workflow operating system. The strategic thesis is orchestration-first integration with strict tenancy, governance, and auditability controls.

2 Current Architecture

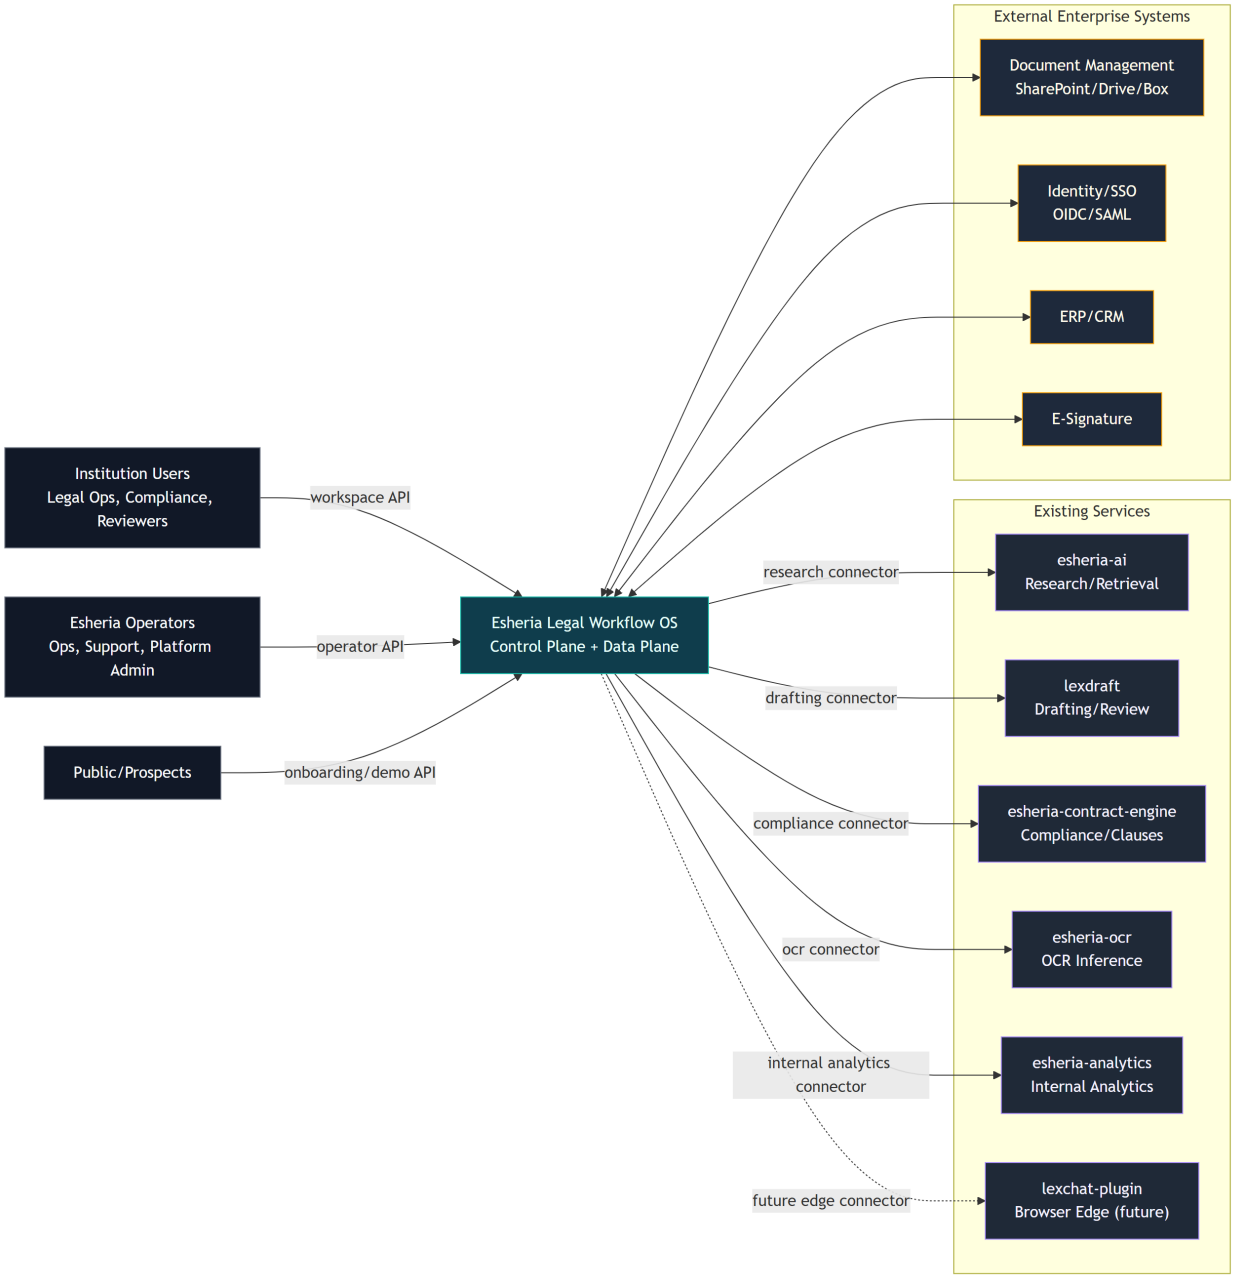

Figure 1: Current system context across actors, services, and enterprise integrations

3 Platform Architecture

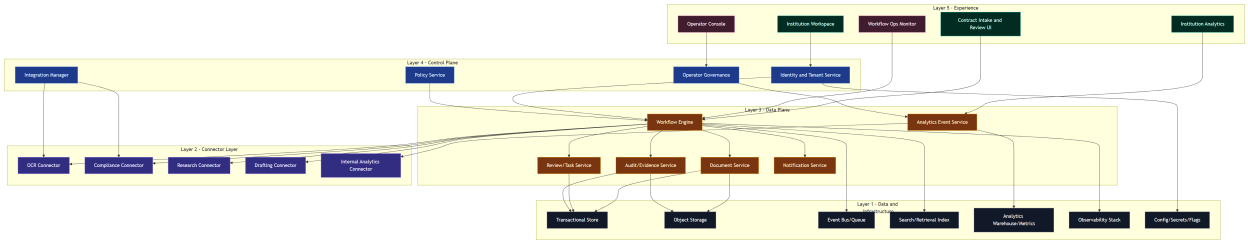

Figure 2: Target layered architecture with control and data plane split

4 Workflow Example

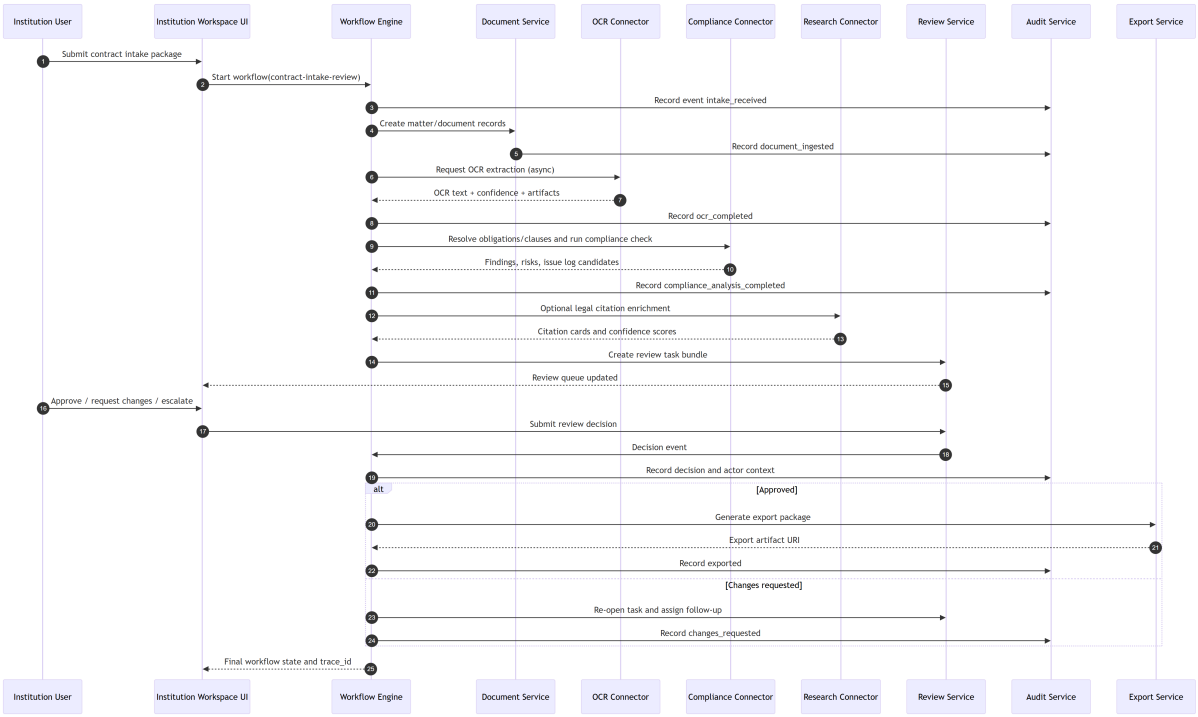

Figure 3: Contract intake and review workflow sequence

5 Dashboards

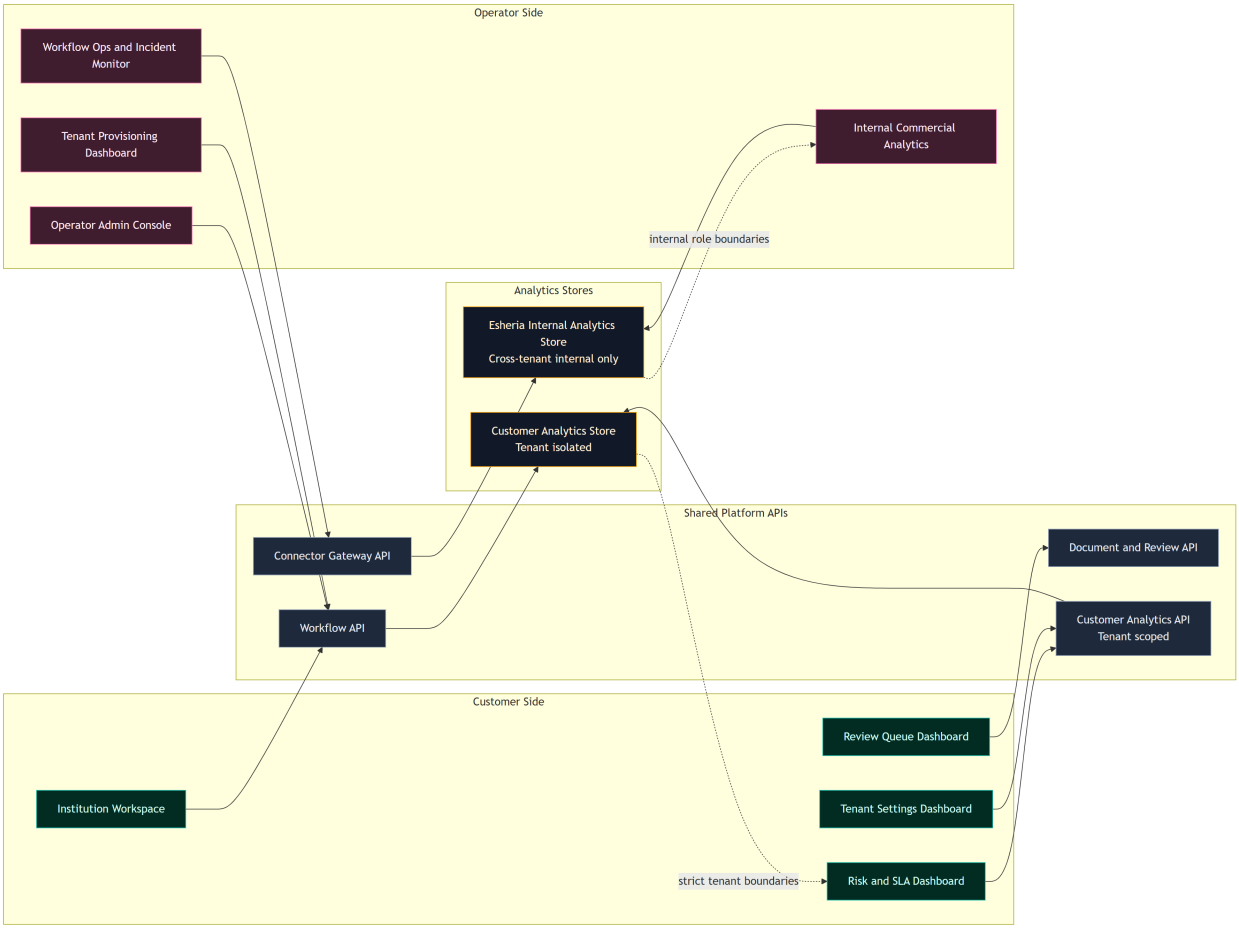

Figure 4: Customer vs operator dashboard topology and analytics separation

6 Integrations

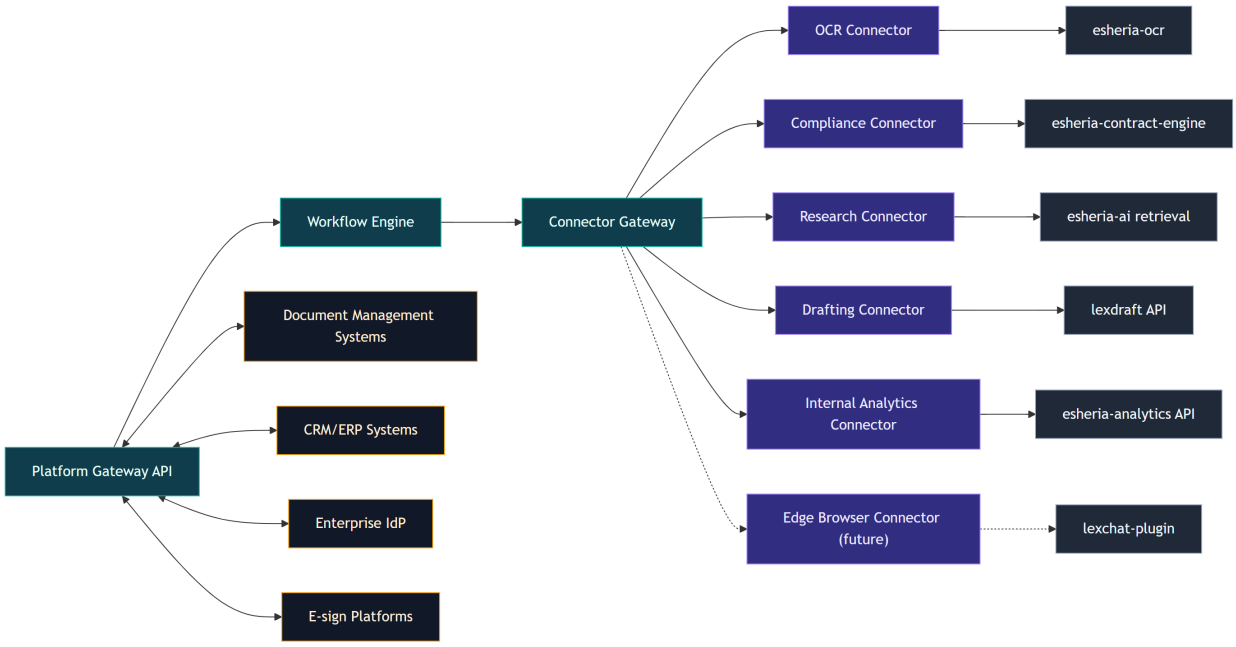

Figure 5: Connector gateway integration map across Esheria services

7 Deployment
