Esheria Legal Workflow OS: Technical Blueprint

2026-03-07

1 System Architecture

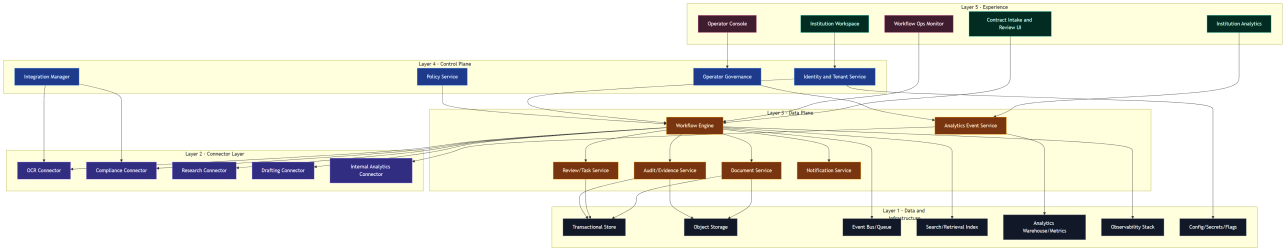

Figure 1: System architecture layers and boundaries

2 API Boundaries

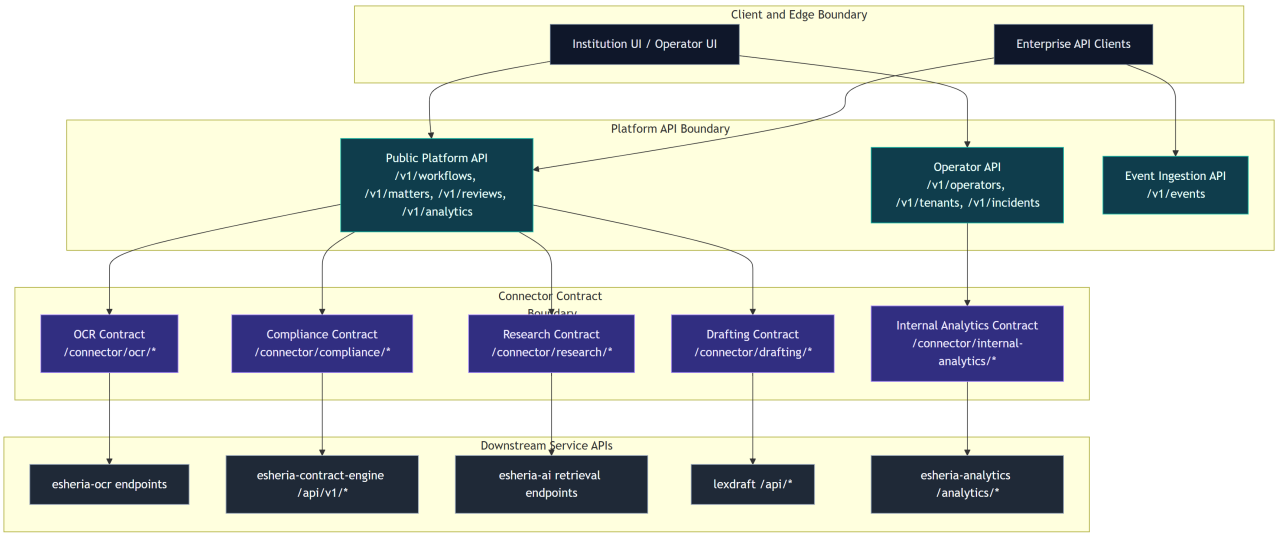

Figure 2: Platform API and connector boundary map

3 Ontology Model

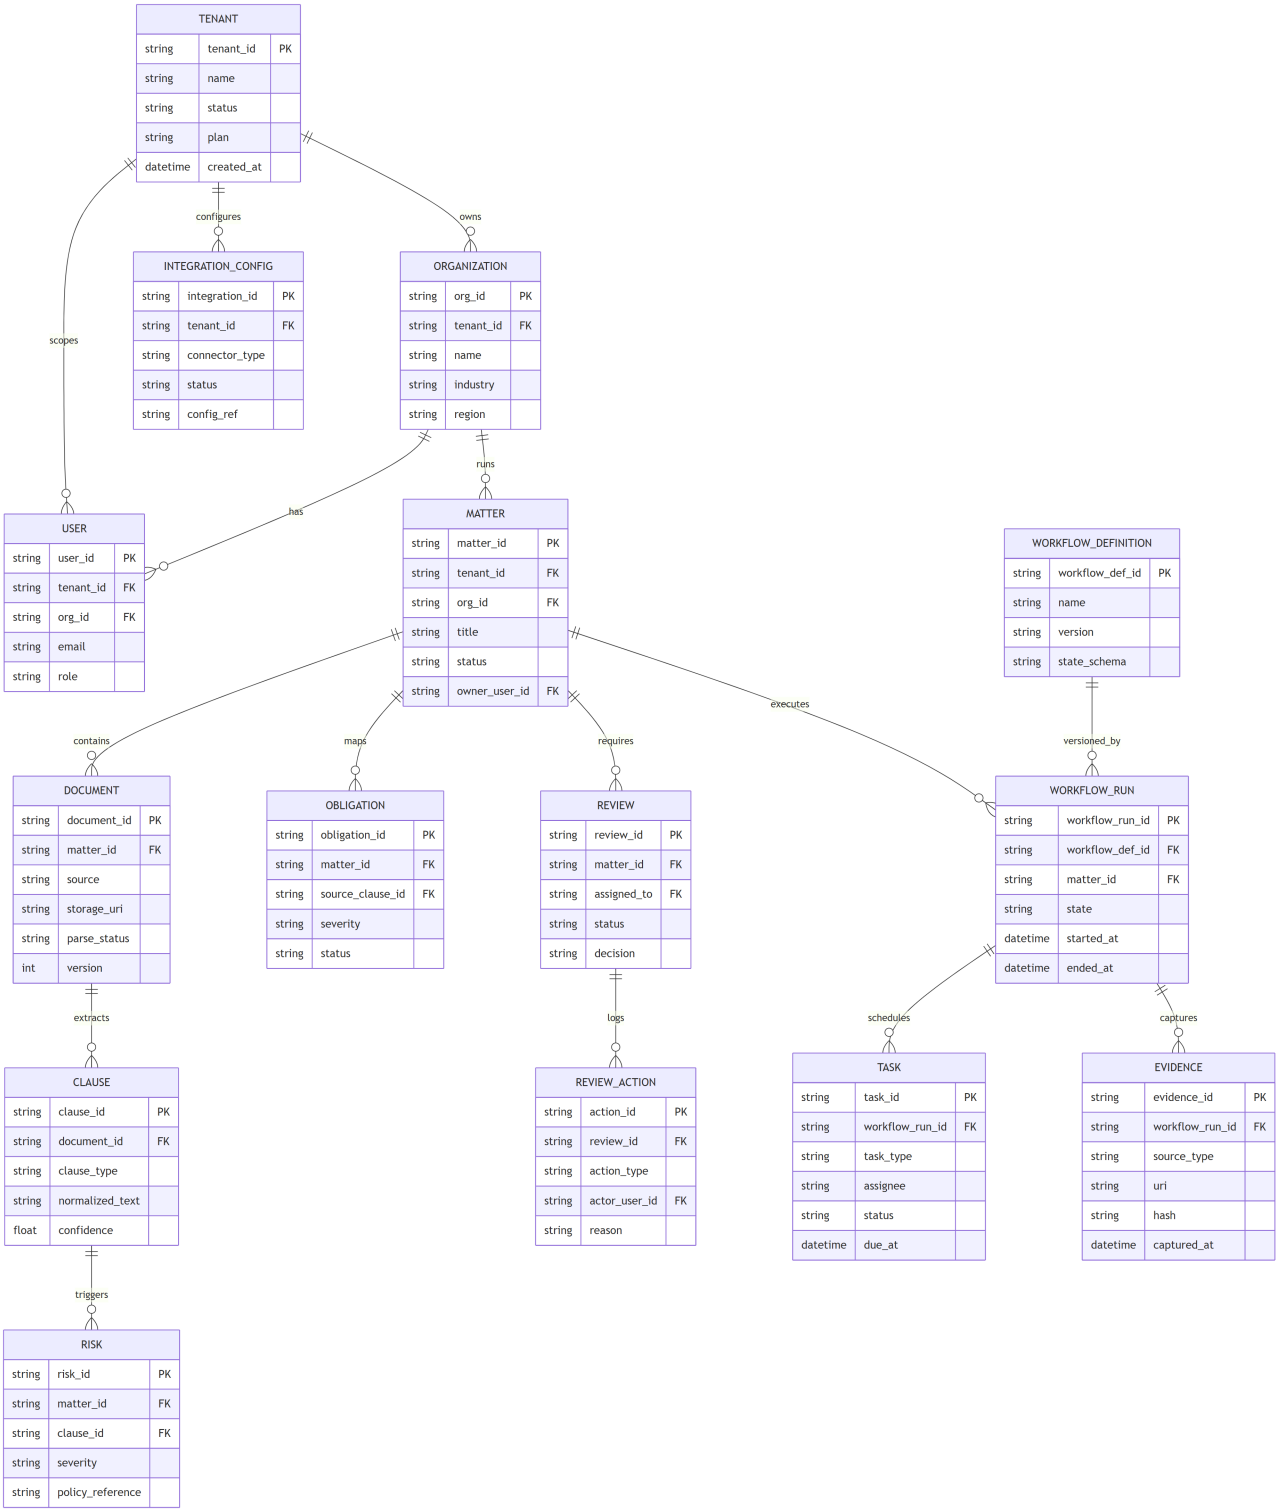

Figure 3: Canonical ontology and key entity relationships

4 Workflow Engine Design

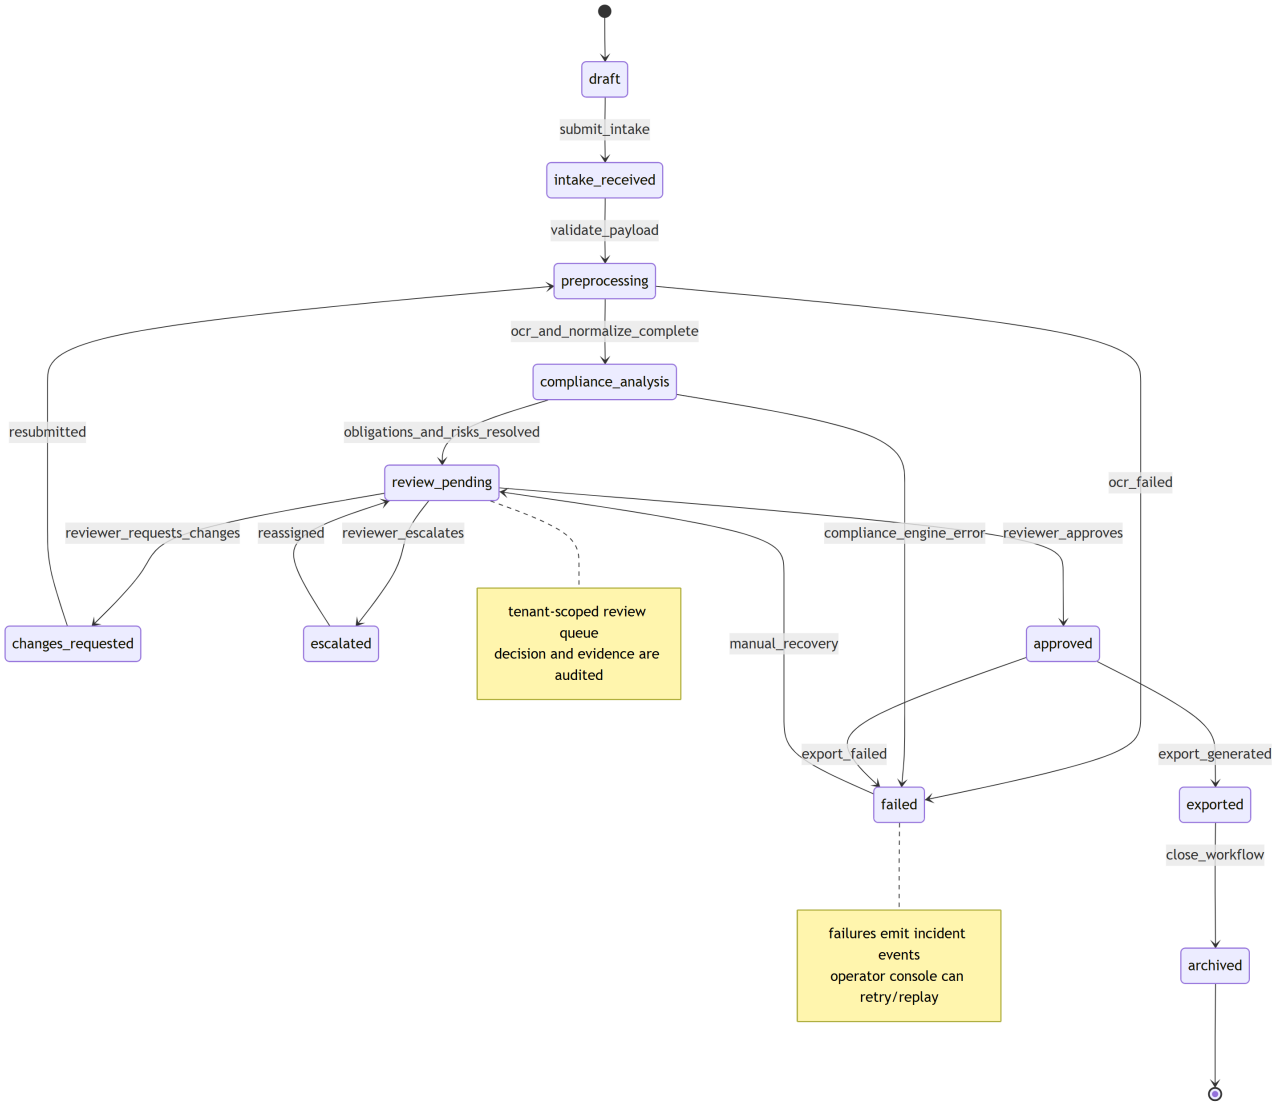

Figure 4: Workflow state machine with deterministic transitions

5 Tenancy Model

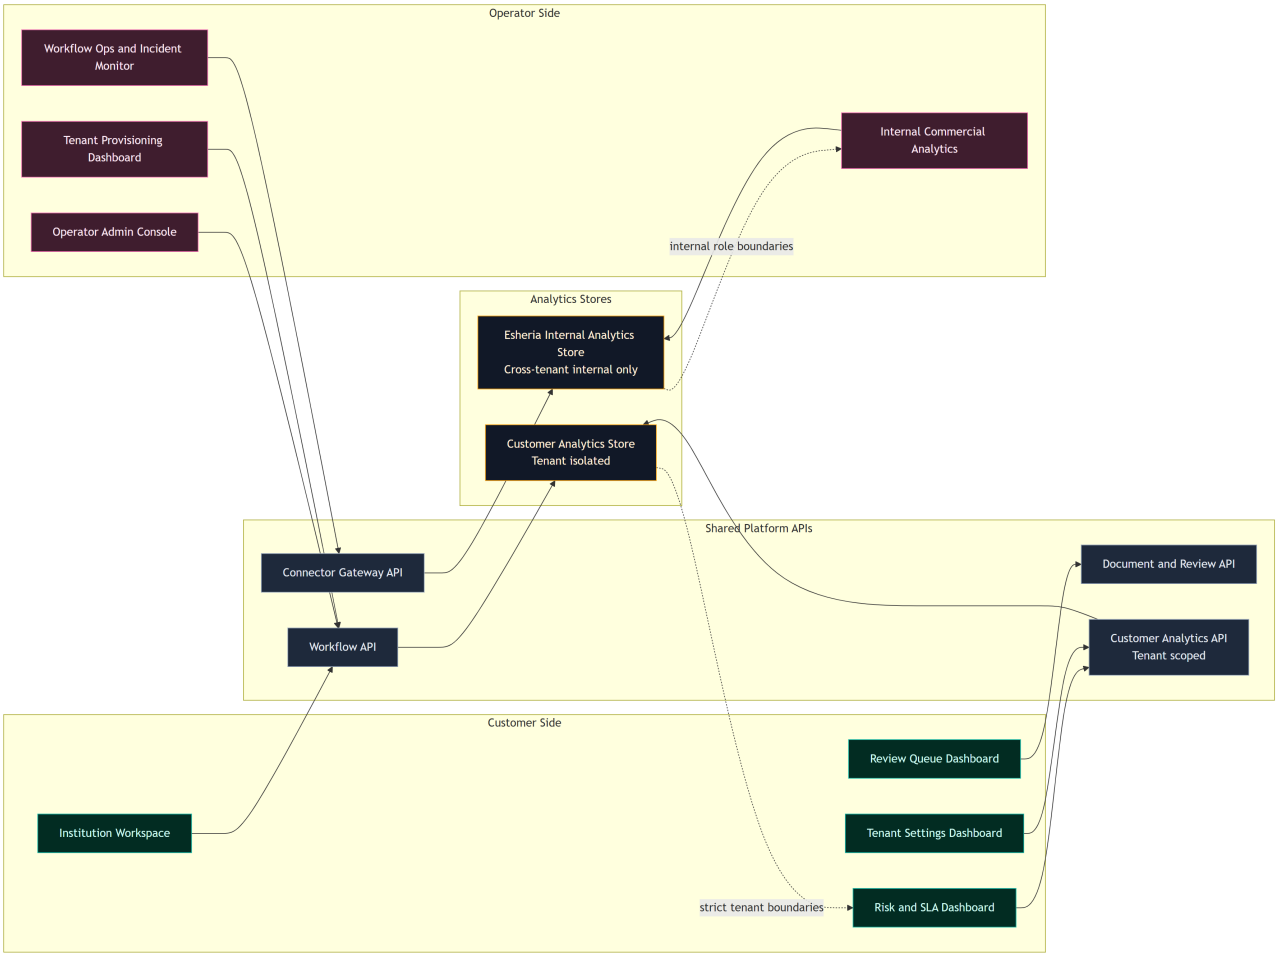

Figure 5: Tenant-scoped customer analytics separated from internal analytics

6 Control vs Data Plane

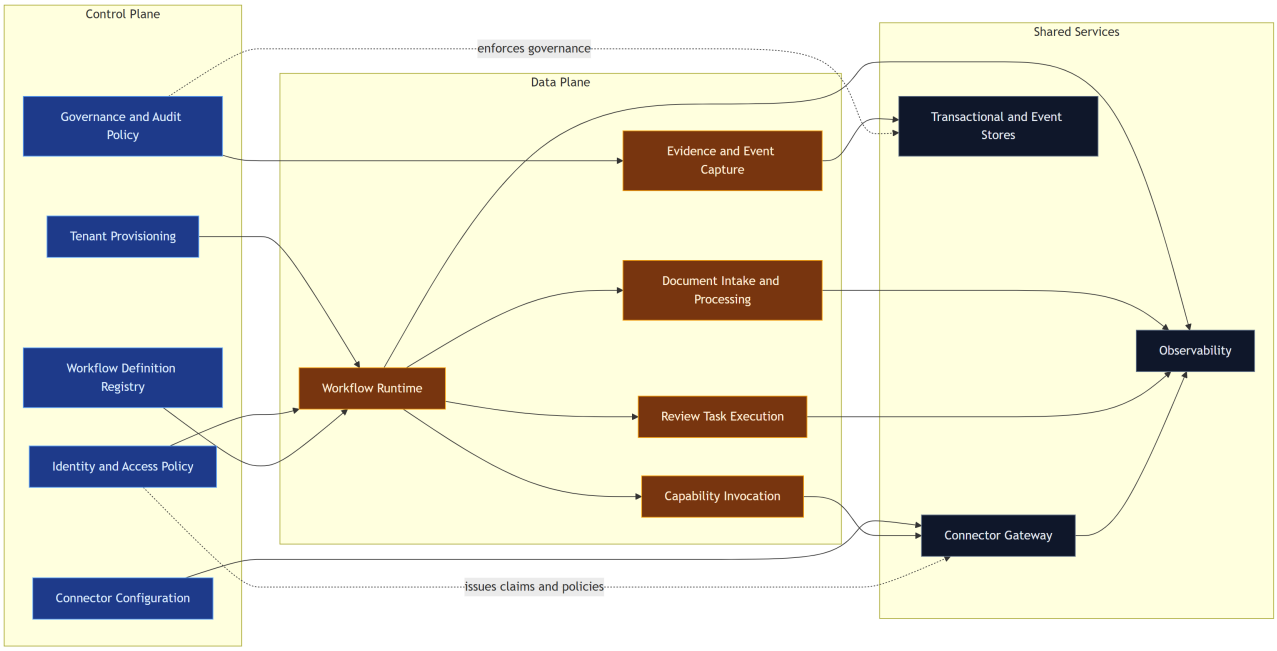

Figure 6: Control-plane and data-plane responsibility split

7 Deployment Topology

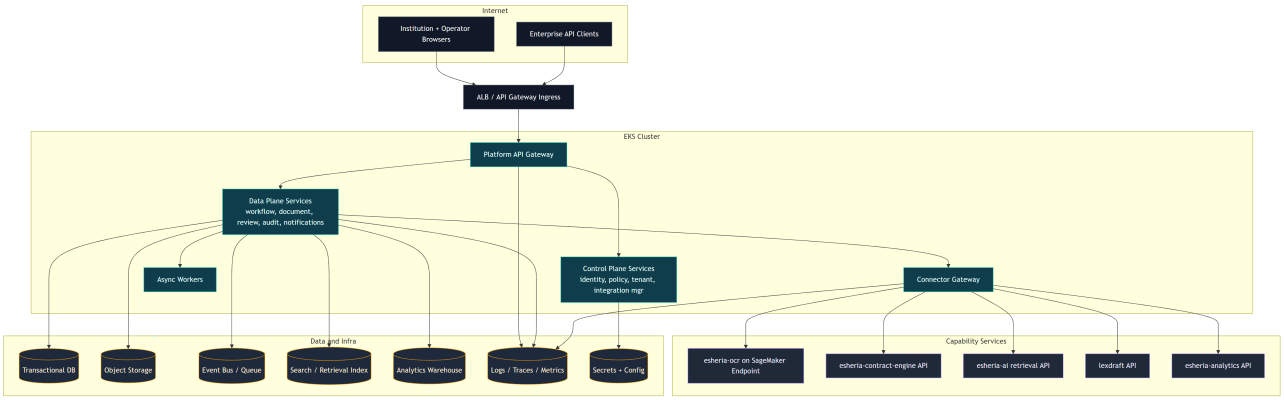

Figure 7: Deployment topology for runtime services and shared infrastructure

8 Integration Architecture

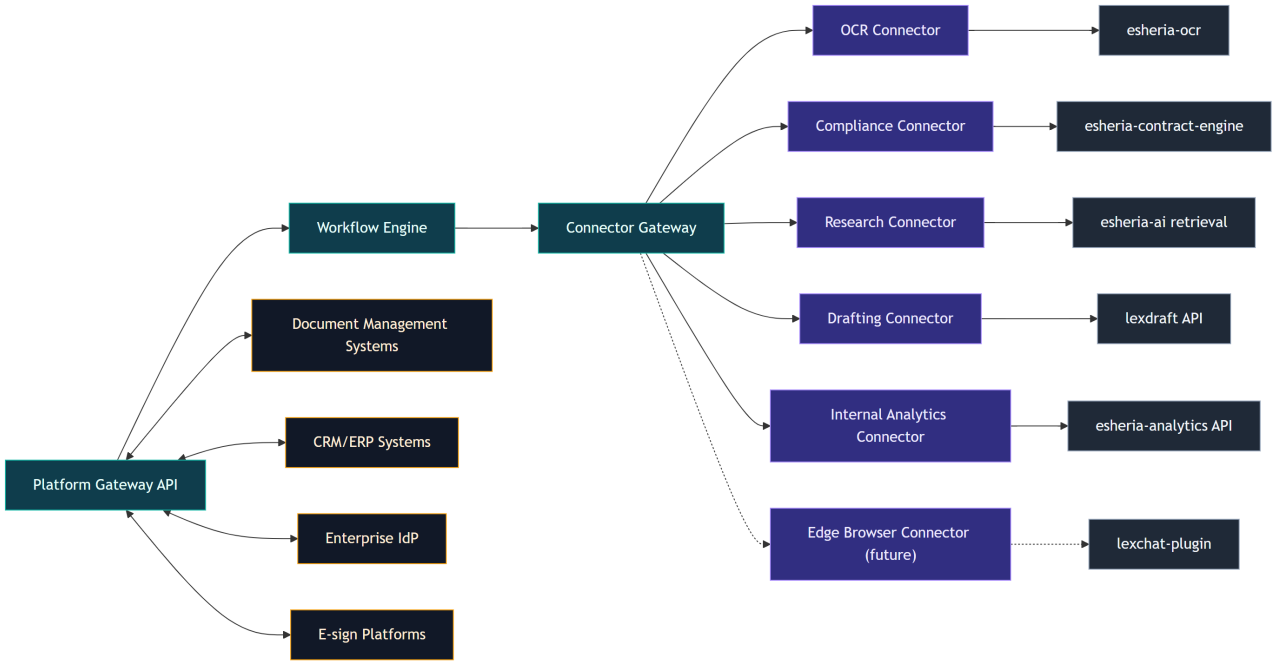

Figure 8: Connector integration architecture
